

## SPRINT REVIEW MEETING (3/29/26)

**Attendees:** Mia Mader, David Martinez, Mariah Harris, Christopher Vivas Zachary Shea

**Start time:** 6:30 pm

**End time:** 7:00 pm

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All

|   |                                                                                                                                            |
|---|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | User Story # 1: As a developer, I want to develop the full front end functionality for users if they wish to read.                         |
| 2 | User Story # 2: As a developer, I want to develop the ability to publish books into the website by url.                                    |
| 3 | User Story # 3: As a developer, I want to develop a bucket that holds all of the URL's for published books.                                |
| 4 | User Story # 4: As a developer, I want to develop the ability for users to visualize and see the main page without the need of logging in. |
| 5 | User Story # 5: As a developer, I want to develop the ability to search for books based on their tags.                                     |
| 6 | User Story # 6: As a developer, I want to develop the ability for admins to read reports.                                                  |

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.
