The following user stories were created/discussed/refined/prioritized.

- User Story 7: Staff/Doctor credential handling and system access (20pts)
 - As a database admin, I want proper controls for staff and doctors so they have proper access to data on appointments and patient information when getting into the system
- User story 8: Patient Data access (20pts)
 - As a database admin, I want the patients data protected and collected properly so other users with correct permissions can access the necessary data

The user stories below are completed.
