

Sprint Review Meeting Minutes

Attendees: Shelby Larrucea, Justin Kurz, Alex Cardoso, Imran Imran, Sebastian Perez Fematt

Start time: 10:00pm

End time: 10:42pm

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- User Story 1: As a reader I want to finish a book and be able to input its title into NextPick and immediately receive a recommendation for my next read based on the book's qualities. (Robust version of algorithm)
- User Story 2: As a user I want the interface to be user friendly and not require advanced skills to manipulate. (Begin working on site)
- User Story 3: As a user I want to be able to receive recommendations without having to create an account or log in. (Site work)
- User Story 4: As a User I want the database to be extensive in order to receive recommendations from a larger pool. (Clean and process dataset)
- User Story 5: As a user I want the algorithm to respond back in a timely manner and not time out requests. (Testing)

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- No User story was rejected, instead all will move forward and be built upon.
