Myckheal Hosang

- How many hours did I work since the last meeting?
 - 3
- What was done since the last scrum meeting?
 - Reviewed the new user story requirements for implementing event-driven notifications when a verification task fails
 - Analyzed how the current Airflow DAG handles task execution and failure states
 - Identified 5_verify_integrity as the primary verification node where alerts should be triggered
 - Sketched the high-level design for how a task failure can trigger a Slack/Webhook notification using Airflow callbacks
- What is planned to be done until the next scrum meeting?

- Research how Airflow's `on_failure_callback` works
- Create a basic Python function that can be triggered on task failure
- Test extracting task context information (task id, error message, execution time) from a failed task
- What are the hurdles?
 - Still becoming familiar with Airflow's callback system and how task context is passed during failures

Tuntufye Mwakalasya
