

Sprint Review Meeting Minutes: 30min

Attendees: Dylan Suniaga, Gabriel Lopez, Anabella Trias, Kevin Duran

Start time: 11:00

End time: 11:30

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: NONE

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- User Stories 1,2,3

Sprint Retrospective Meeting

What went right, what went wrong.

Dylan Suniaga: Started optimizing notebooks for faster performance. Need to buy more Colab Credits to run the multiple image analysis for multiple hours. So far, it has ran and stored some products, but not all 60k

Anabella Trias: Successfully reviewed a new dataset provided by Dylan with more columns for the NLP TF-IDF model. Began implementing code from outline to perform comparison baseline model from descriptions, titles, and keywords.

Gabriel Lopez: Successfully reviews old dataset from dylan and started implementing feature engineering ideas for the products. The dataset is huge and there are many columns, but I have learned a lot and improved since the last sprint.

Kevin Duran: Reviewed the dataset and started searching for better methods for NLP. Worked in private on new methods and functions to help provide more detailed sentiment for each product. Using product titles and descriptions.
