

Daily Scrum Meeting Minutes:

Attendees: Monisha Kummari, Gabriel Xirinachs, Chloe Lindsay, Maria Vega Gonzalez, Jabbar Morla

Start time: 3:30 PM

End time: 4:00 PM

Monisha Kummari:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Reviewed anomaly scores across different user scenarios and refined documentation to better reflect UI behavior and threshold interpretation.
- What is planned to be done until the next scrum meeting?
 - Finalize alignment between technical documentation and UI descriptions for anomaly score interpretation.
- What are the hurdles?
 - Ensuring anomaly score explanations remain consistent across both technical documentation and user facing UI descriptions.

Gabriel Xirinachs:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Continued testing API integration across additional frontend scenarios and addressed request-response inconsistencies.
- What is planned to be done until the next scrum meeting?
 - Stabilize integration by resolving edge-case issues and ensuring reliable data flow between frontend and backend systems.
- What are the hurdles?
 - Identifying and resolving irregular issues that only appear under specific frontend integration patterns.

Maria Vega Gonzalez:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Performed extended validation testing with varied input cases and ensured alignment between validation logic and preprocessing behavior.
- What is planned to be done until the next scrum meeting?

- Strengthen validation coverage to capture less obvious edge cases before they reach the model.
- What are the hurdles?
 - Catching less obvious edge cases that may not appear in standard testing scenarios.

Chloe Lindsay:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Improved UI responsiveness and ensured model outputs are displayed clearly under varying user input conditions.
- What is planned to be done until the next scrum meeting?
 - Further enhance UI stability and optimize handling of rapid or repeated API responses.
- What are the hurdles?
 - Maintaining consistent UI behavior when handling rapid or repeating API responses.

Jabbar Morla:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Conducted additional testing on form interactions and refined error handling to improve user input feedback.
- What is planned to be done until the next scrum meeting?
 - Finalize form behavior across all input scenarios and ensure robustness against unexpected user inputs.
- What are the hurdles?
 - Handling unexpected user inputs without disrupting the overall application flow.
