

Daily Scrum Meeting Minutes:

Attendees: Monisha Kummari, Gabriel Xirinachs, Chloe Lindsay, Maria Vega Gonzalez, Jabbar Morla

Start time: 1:30 PM

End time: 2:00 PM

Monisha Kummari:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Continued stress testing the inference service and reviewed prediction response behavior under additional simulated load scenarios.
- What is planned to be done until the next scrum meeting?
 - Work with the backend integration components to ensure responses remain consistent with the API schema during heavier testing conditions.
- What are the hurdles?
 - Monitoring latency spikes during higher request volumes.

Gabriel Xirinachs:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Expanded structured logging coverage to capture additional API events and prediction activity.
- What is planned to be done until the next scrum meeting?
 - Refine monitoring outputs and review logs to ensure they provide useful diagnostic insights.
- What are the hurdles?
 - Balancing logging detail without introducing unnecessary overhead.

Maria Vega Gonzalez:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Expanded preprocessing validation checks and tested them using additional datasets.
- What is planned to be done until the next scrum meeting?
 - Continue refining validation coverage to detect preprocessing inconsistencies earlier.
- What are the hurdles?

- Identifying subtle preprocessing variations before they affect predictions.

Chloe Lindsay:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Continued analyzing anomaly detection behavior with additional simulated input patterns.
- What is planned to be done until the next scrum meeting?
 - Refine anomaly detection documentation and verify threshold stability across test inputs.
- What are the hurdles?
 - Maintaining stable detection performance across diverse input patterns.

Jabbar Morla:

- How many hours did I work since the last meeting?
 - 3 hours
- What was done since the last scrum meeting?
 - Continued environment standardization efforts and tested deployment setup on another development machine.
- What is planned to be done until the next scrum meeting?
 - Finalize environment configuration guidelines and confirm deployment works consistently across systems.
- What are the hurdles?
 - Resolving minor dependency differences between environments.
