

Sprint Planning Meeting Minutes:

Attendees: Lauren Stone (#6235603), Daniel Gonzalez (#6285324), Juan de Dios Nunez (#6497675), Nicholas Brotherhood (#6352749), Daniel Bencomo (#6286672)

Start time: 10:30 PM

End time: 11:00 PM

After discussion, the velocity of the team was estimated to be 5-7 user stories for this sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **User Story 1:** As a user, I want to see a brief explanation of my AudioAura, including the meaning of its colors and traits, so that I can easily understand how my listening data was interpreted.
- **User Story 2:** As a user, I want my Top Artists and Songs summary to be cached for some time so that load times are improved and unnecessary API calls are reduced.
- **User Story 3:** As a user, I want the report's color scheme to reflect my AudioAura so that the experience feels visually consistent with my analysis.
- **User Story 4:** As a user, I want to view my top songs across different time ranges (4 weeks, 6 months, and 1 year) so that I can explore how my listening habits change over time.
- **User Story 5:** As a user, I want to see a summary of my top songs and artists so that I can quickly understand my listening trends.

The team members indicated their willingness to work on the following user stories.

- Lauren Stone
 - User Story: 1
 - User story: 3
- Daniel Gonzalez
 - User story 3
 - User story 4
- Juan de Dios Nunez
 - User Story: 2
