After a show and tell presentation, the implementation of the following user stories were accepted by the product owners:

- User story 4: As a user I would like an easily accessible interface
- User story 3: As a user I would like a friendly log in page
- User Story 2: As a user I would like to log into my spotify account without having to create an account
- User Story 5: As a user I would like secure authentication when logging into my spotify account

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

 - The user story was too abroad, it may be split into smaller user stories to allow better estimation and sprint planning.
