

Sprint Review Meeting Minutes

Attendees: Lauren Stone (#6235603), Daniel Gonzalez (#6285324), Juan de Dios Nunez (#6497675), Nicholas Brotherhood (#6352749), Daniel Bencomo (#6286672)

Start time: 5:00 PM

End time: 6:00 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners:

- **User Story 1:** As a user, I want to view a short textual explanation of my AudioAura (including what my colors and traits mean) so that I can easily understand how my listening data was interpreted.
- **User Story 2:** As a user, I want to see a percentage breakdown of the top 5 genres that I listen to.
- **User Story 3:** As a user, I want the music report page to load smoothly with a clear loading state so that I know my data is being processed and the application feels responsive.
- **User Story 4:** As a user, I would like to fetch an analysis including tempo, danceability, etc. of my top 5 songs.
- **User Story 5:** As a user, I would like to find out the genre of my top artists.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- All user stories were accepted.
