

Sprint Planning Meeting (Sprint 1)

Attendees:

Brian Cardona, Edima Nyong, Enrique Rodriguez, Matias Casal, Matthew Privat

Start time: 7:00 PM

End time: 7:30 PM

The team met to plan the first sprint and discussed the overall idea of the application. Since this was the initial sprint, the focus was on research, exploring possible tools, and setting up the basic structure of the project.

User Stories Selected for This Sprint

1. As a user, I want the team to research camera-based scanning so that images can be captured effectively.
 2. As a user, I want the team to evaluate OCR approaches so that text can be extracted from labels.
 3. As a user, I want a basic UI layout so that results can be displayed clearly.
 4. As a developer, I want to explore database options so that user data can be stored.
 5. As a developer, I want to set up a basic backend structure so that future features can be built.
-

Task Assignments

Brian Cardona

- Research backend structure and begin setup

Edima Nyong

- Research and test camera scanning approaches

Enrique Rodriguez

- Design basic UI layout

Matias Casal

- Research OCR tools and APIs

Matthew Privat

- Research database options and begin setup
