Aykhan Pashayev:

- How many hours did I work since the last meeting?
 - I worked for 2 hours.
- What was done since the last scrum meeting?
 - Test user named anomai-test-actor and activity creator script created. This will make unusual Api calls and will allow us to develop our anomalies logic.

- What are the hurdles?
 - No hurdles

Cheng Zhang:

- How many hours did I work since the last meeting?

- I worked 3 hour.
- What was done since the last scrum meeting?
 - Tested the initial embedding design using sample normalized events and generated the first set of actor embeddings. Calculated similarity-based model scores by comparing current embeddings with baseline behavior. Finalized the model input/output schema and drafted the first version of the combined risk score formula
- What is planned to be done until the next scrum meeting?
 - Prepare an end-to-end example that goes from normalized events → feature signals → embedding → model score → final risk score. Begin integrating the model score into the API response format.
- What are the hurdles?
 - No hurdles at this time.

Alex Linghay Eng:

- How many hours did I work since the last meeting?
 - 2 hours
- What was done since the last scrum meeting?
 - Asked around about my ui ideas
