

Daily Standup Meeting Minutes

Attendees: Aykhan Pashayev, Charlie Iglesias, Cheng Zhang, Alex Linghay Eng, Nicolas Su Nobrega

Start Time: 7:30 PM EST

End Time: 8:00 PM EST

Aykhan Pashayev:

- How many hours did I work since the last meeting?
 - I worked for 3 hours.
- What was done since the last scrum meeting?
 - Using anomai-test-actor and activity creator script, logs about unusual Api spikes, logins, different region access created. Currently, working on the script will read the normalized logs from the DynamoDB table and find incidents.
- What is planned to be done until the next scrum meeting?
 - I need to resolve issue with codespace on GitHub. After that, I'll continue working and improving the script, which will read the normalized logs from the DynamoDB table and find incidents.
- What are the hurdles?
 - GitHub Codespace does not work for unknown reasons, trying to resolve the issue.

Charlie Iglesias:

- How many hours did I work since the last meeting?
 - I worked for 3 hours since the last meeting
- What was done since the last scrum meeting?
 - I reviewed the feedback on my script from the team and made improvements
- What is planned to be done until the next scrum meeting?
 - I will finalize the script with improvement from team feedback
- What are the hurdles?

- None

Cheng Zhang:

- How many hours did I work since the last meeting?
 - I worked 3 hours.
- What was done since the last scrum meeting?
 - Refined the API-to-UI information architecture and completed the component-level logic for how risk scores, explanations, and feature signals should appear in the interface.
 - Reviewed this week's incident-detection objectives and identified the exact updates needed for the incident JSON format. Prepared the plan for extending the existing API schema and example output to support the new incident structure required by the detection MVP.
- What is planned to be done until the next scrum meeting?
 - Update the API schema and example output to fully support the incident JSON shape defined for this week's MVP.
 - Create a small incident schema document that standardizes fields such as incident_id, incident_type, severity, timestamps, rule_score, final_risk_score, triggered_features, explanation, and evidence.
 - Begin translating the finalized information architecture into the first draft of the UI wireframe, ensuring it aligns with the new incident format and can be consumed by the static incidents.json file
- What are the hurdles?
 - No hurdles at this time.

Alex Linghay Eng:

- How many hours did I work since the last meeting?
 - 2 hours
- What was done since the last scrum meeting?
 - Worked on a semi usable powerpoint version of the mockup
- What is planned to be done until the next scrum meeting?
 - Finish up on it
- What are the hurdles?
 - It is terrible

Nicolas Su Nobrega:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - I verified CloudTrail event output against the API field structure
- What is planned to be done until the next scrum meeting?
 - I will ensure all required fields are available for downstream risk scoring
- What are the hurdles?
 - No hurdles
