

Sprint Planning Meeting Minutes

Attendees: Aykhan Pashayev, Charlie Iglesias, Cheng Zhang, Alex Linghay Eng, Nicolas Su Nobrega

Start Time: 7:30 PM EST

End Time: 8:00 PM EST

After discussion, the velocity of the team was estimated to be 1 story per person for sprint. The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

User Stories:

1. As a stakeholder, I want the dashboard UI connected to the backend API so that detected incidents are displayed dynamically in the dashboard instead of static or test data. (6 points)
2. As a user, I want the dashboard UI to undergo structured testing and debugging so that incident information is displayed correctly and consistently across all components. (5 points)
3. As a SOC analyst, I want a chat assistant tab integrated into the dashboard so I can ask questions about detected incidents and receive contextual explanations. (6 points)
4. As a developer, I want the chat assistant connected to the incident data pipeline so that it can access relevant incident details when answering user questions. (5 points)
5. As a project lead, I want the full dashboard system (UI + incident data + chat tab structure) prepared for final demo testing so we can demonstrate the system workflow clearly. (6 points)

Team Member Commitments:

1. Aykhan Pashayev: User story 3
2. Charlie Iglesias: User story 1
3. Cheng Zhang: User story 2
4. Alex Linghay Eng: User story 4
5. Nicolas Su Nobrega: User story 5
