

Sprint 6 Backlog Grooming Meeting Minutes:

Attendees: <Christian Mendez, Haruki Horiuchi, Serkens Delice, Ashley Agbonkhese, Ajani Cole>

Start time: <9:00PM>

End time: <10:00PM>

The following user stories were created/discussed/refined/prioritized.

- During the meeting, the team created, discussed, refined, and prioritized user stories for the sprint. The below user stories are from last sprint that we want to continue to prioritize, as they stand as the basis for our work during each sprint
 - User Story #1: As a student team member, I want to refine and document the finalized purpose, scope, and core features of LinguaLink, so that all team members share a consistent understanding and future development decisions remain aligned.
 - User Story #2: As a student developer, I want to review and document the current system architecture and codebase structure, so that the application is easier to maintain, scalable, and ready for future development.
 - User Story #3: As a student designer,
I want to create and document the initial UI and UX guidelines for LinguaLink, so that the application's design is visually consistent and user-friendly, supporting the project's overall goals.

The user stories below have been accepted to be completed during the remainder of the sprint.

- All User Stories remain the same for the remainder of the sprint.
