

Attendees: Bosco Silva, Diego Hernandez, Didier Campos, Gunther Alonso, Timothy Rocha,
Alejandro Arietta (Product Owner)

Start time: **9:30 PM**

End time: **10:10 PM**

Did we do a good job estimating our team's velocity?

Yes, we did a good job in estimating our team's velocity. We finished most of the tasks around the time we said we would do it.

What went wrong?

-Scheduling was a bit difficult at first but as time went on, we were able to get comfortable with each other's schedules.

-We also weren't able to finish all the tasks as we knew they were going to take more than one sprint

- Did we do a good job estimating the points (time required) for each user story?
 - Yes, everything was planned out and we kind of knew the user stories that would take more time compared to others.
- Did each team member work as scheduled?
 - Each team member worked as scheduled although we did have conflicting schedules since some of us worked. However, we were able to figure it out and solve the issues.

What went right?

-Worked well as a team and despite differing schedules and made effort in progressing the project.

How to address the issues in the next sprint?

- How to improve the process?
 - Communicate better in order to schedule meetings more accordingly and with more time.
- How to improve the product?
 - Continue to work on our learning data set in order to better train the AI.
