

Review Meeting Minutes

Project: AI Mock Interview Prep

Attendees: Daniella Fuentes, Lindsey Blais, Nakisha Strickland

Start time: 3:00 PM

End time: 4:00 PM

After a show and tell presentation, the implementation of the following user stories was accepted by the product owners:

- **User Story 1:** Create a pool of behavioral interview questions.
- **User Story 2:** Build the initial feedback system to provide responses after each answer.
- **User Story 3:** Design and implement the feedback screen with icons and progress indicators.
- **User Story 4:** Connect user responses to the database for storage and retrieval.
- **User Story 5:** Organize interview questions into beginner, intermediate, and advanced categories.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- None
 - How this should be reflected in the user story definition in Mingle:
 - All five user stories were marked as Completed and linked to this sprint.
 - Story feedback, where applicable, was recorded as comments in Mingle for possible future enhancements (such as refining adaptive flow or improving UI polish).
 - The product owner noted that the team's progress was solid, with the feedback feature showing noticeable improvement in clarity and usefulness.
