

Sprint Retrospective Meeting Minutes

Attendees: Alexander Hued, Nicholas Delgado, Amanda Bustinza

Start time: 7:00 p.m.

End time: 8:00 p.m.

What went wrong?

- Did we do a good job estimating our team's velocity?
 - Yes, we worked at a moderate velocity, as we predicted earlier.
- Did we do a good job estimating the points (time required) for each user story?
 - Partly yes, as we were able to complete User Story 1 and User Story 3. We were able to complete these in the amount of time we were expecting. However, we could have done a better job in estimating the time for User Story 2, and will be assigning it to a future Sprint Planning.
- Did each team member work as scheduled?
 - Each team member worked according to the schedule.

What went right?

- We did a good job of communicating and attending our planned meetings throughout this sprint, despite the difficulty of acclimating to daily meetings throughout the week along with our new semester's workload.

How to address the issues in the next sprint?

- How to improve the process?
 - As we continue to work, we will be able to more fairly estimate the time it takes to complete each step. During this first Sprint, we did a lot of research and planning that may improve our efficiency by giving us a greater idea of the time we need to spend doing each step.
- How to improve the product?
 - At this stage we are only just beginning, so improving the product is just further development until we have the structure of what we wanted to create complete.
