

Sprint Review Meeting Minutes

Attendees: Alexander Hued, Nicholas Delgado, Amanda Bustinza

Start time: 7:00 p.m.

End time: 8:00 p.m.

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- User Story 4: Designing and implementing the UI with all features for teaching programming languages, expanded to a more professional layout.
- User Story 5: Refining the prototype based on prior research and improving responsiveness across devices.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- User Story 3: Additional polishing of the interface and further testing of new features for user experience improvements.
 - We want to continually improve the interface as we work, but we want new features to take a backseat to core features, in order to prevent feature creep.
