

Date: 12/01/2025

Attendees: Brian Garcia, Carlos Escobar, Monica Burbano, Bianca Recendiz, Lesly Recendiz

Start time: 10:45 pm

End time: 11:45 pm

Spent time: 1:00

Student 1: Carlos Escobar

- What have you done since the last scrum meeting?
 - Since the last meeting, I expanded the unit test coverage to include more of the framework's modules and fixed a few issues that came up during testing. I also finished integrating a code quality tool into the pipeline, which is already helping us spot style and formatting problems early.
- What is planned to be done until the next scrum meeting?
 - For the next meeting, I plan to start working on integration tests that check how different modules interact with each other. I also want to review the test results with the team to make sure everyone understands how to use the new testing setup.
- What are the hurdles?
 - One of the hurdles I've run into is that some modules don't have clear inputs and outputs yet, which makes it harder to design integration tests. I'll probably need to coordinate with the rest of the team to clear that up.

Student 2: Monica Burbano

- What have you done since the last scrum meeting?
 - I completed testing some test cases of user inputs to ensure the frontend/backend connectivity. I made note on some minor misalignments on the user interface and organized them for review by the team
- What is planned to be done until the next scrum meeting?
 - I plan to look over the UI notes with the team, start patching the layout inconsistencies and keep validating that everything is still representing the correct backend routes. I also like to make a little checklist of remaining testing tasks.
- What are the hurdles?
 - I did not have any major hurdles.

Student 3: Brian Garcia

- What have you done since the last scrum meeting?
 - I been finishing all the little things. For the finished project.

What is planned to be done until the next scrum meeting?

- I plan on working on the poster for the presentation.

- What are the hurdles?
 - The biggest challenge has been syncing frontend components with evolving backend structures.

Student 4: Bianca Recendiz

- What have you done since the last scrum meeting?
 - Since the last scrum meeting, I have worked on our project's poster.
- What is planned to be done until the next scrum meeting?
 - I plan to work on our project's documentation.
- What are the hurdles?
 - I had no major hurdles.

Student 5: Lesly Recendiz

- What have you done since the last scrum meeting?
 - Since the last meeting, I have finished working on the poster that will be using for the showcase.
- What is planned to be done until the next scrum meeting?
 - For the next meeting, I will begin working on preparing the project's documentation.
- What are the hurdles?
 - No major hurdles since last meeting.
