

Sprint Planning Meeting Minutes: 11/10/2025

Attendees: Luis Delgado, Andres Hernandez Raggioli, Gaeldesh Demosthene, Ana Oliveira

Start time: 8:00 pm

End time: 9:00 pm

After discussion, the velocity of the team was estimated to be 30 story points per sprint.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **User Story 6:** As a student, I want to see clear and helpful error messages (like “Deck failed to upload — check file format”) so that I can understand what went wrong and fix it easily.
- **User Story 7:** As a student, I want to switch between light and dark mode so that I can study comfortably in different lighting environments.
- **User Story 8:** As a student, I want my progress and decks to sync automatically across devices so I can continue studying wherever I left off.
- **User Story 9:** As a student, I want the app to adapt to my learning pace — showing me the cards I struggle with more often — so I can master content faster.
- **User Story 10:** As a student, I want to provide quick feedback or report bugs directly from the app so that I can help improve the experience.

The team members indicated their willingness to work on the following user stories.

- Andres Hernandez Raggioli
 - **User Story 8:** As a student, I want my progress and decks to sync automatically across devices so I can continue studying wherever I left off.
 - **User Story 9:** As a student, I want the app to adapt to my learning pace — showing me the cards I struggle with more often — so I can master content faster.
