

Sprint Planning Meeting Minutes:

Attendees: Luis Delgado (Product Owner), Andres Hernandez Raggioli (Scrum Master), Ana Oliveira (Developer), Gaeldesh Demosthene (Developer)

Start time: 4:00 PM

End time: 4:30 PM

After discussion, the velocity of the team was estimated to be **20 hours for this initial sprint**, based on the team's availability of 1 hour per day per member.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

- **GitHub Repository Setup [1]:** As a developer, I want a shared GitHub repository, so that the team can collaborate on the project codebase efficiently.
- **Local Development Environment Setup [2]:** As a developer, I want to set up my local development environment, so that I can run and test the project code consistently.
- **API Research [3]:** As a developer, I want to research possible APIs, so that the team can determine which ones best fit our project needs.
- **System Architecture [4]:** As a developer, I want to create an initial architecture, so that the team has a blueprint for how the system components will work together.
- **Frontend Design [5]:** As a user, I want to see initial UI designs, so that I can understand how I will interact with the system.

The team members indicated their willingness to work on the following user stories.

- Luis Delgado
 - 1, 2
- Andres Hernandez Raggioli
 - 2
- Ana Oliveira
 - 4
- Gaeldesh Demosthene
 - 3, 5
