

Smart Spender Installation Guide

1. Requirements

- VS Code and Live Server extension.
- Any modern web browser.

2. Downloading the Project

- Download the Smart-Spender folder.
- It should contain: index.html, dashboard.html, styles.css, script.js.

3. Running the Project

- Open the folder in VS Code.
- Right click index.html, choose "Open with Live Server." - The login page will open in your browser.

4. Demo Login

- Email:

demo@smartspender.com -

Password: Password123!

5. Dashboard

- Shows fake budget, expenses, balance, and transactions.

6. Logout

- Clears session and returns to login screen.

7. Notes

- This is a demo only. No real authentication or database.
