

Daily Standup Meeting Minutes

Date: 10/16/2025

IT Project: Personal Budget Tracker Website

Meeting Summary:

The team has completed about half of the project's code and continues collaborating through the shared GitHub repository created by **David Edelduok**. We focused on refining the framework and ensuring that all existing code compiles correctly. Once the foundation is fully stable, we plan to continue building the website's intended aesthetic and improving user interaction across all pages. During the meeting, we also discussed seeking additional support from tutors if any coding or compilation issues arise, to ensure steady progress and high-quality outcomes.

- Pages 1 & 2 (Intro and Name Input): **David Edelduok**
- Pages 3 & 4 (Password & Security Questions): **Miladys Perez**
- Pages 5 & 6 (Bank Info & Account Setup): **Maria Flores**
- Pages 7 & 8 (Budget Overview & Overspending): **Malik Wahab Rashid**
- Pages 9 & 10 (Total Savings & Income vs. Expenses): **Randy Pierre**

Team Roles

[Miladys Perez] - Scrum Manager/Product Owner: Will track progress, define vision, and ensure tasks are clear.

[Maria Flores] - Wireframe designer: Will sketch rough page layouts for Home, Login, and Dashboard.

[David Edelduok] - Flow planner: Will describe the step by step process a user will take - from signing up to using the site.

[Malik Wahab Rashid] - GUI Stylist: Will suggest color, fonts, and styles - how should the site feel visually.

[Randy Pierre] - Feature Writer : Will write a list of 3-4 things the website should let the users do.
