

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 3:40 PM

End time: 4:00 PM

Luis Gonzalez:

- **How many hours did I work since the last meeting?**

2 hours

- **What was done since the last scrum meeting?**

Finalize parser choice and begin integrating the selected tool into the main processing pipeline.

- **What is planned to be done until the next scrum meeting?**

Begin adapting the integration to handle diverse document structures and test parsing consistency.

- **What are the hurdles?**

Text overlap and parsing issues on PDFs with unusual spacing or embedded elements.

Anjani Mogallur:

- **How many hours did I work since the last meeting?**

2 hours

- **What was done since the last scrum meeting?**

Choose the most effective summarization approach and start integrating it with the output of the text extraction pipeline.

- **What is planned to be done until the next scrum meeting?**

Run batch tests on multiple documents and evaluate summarization accuracy and performance.

- **What are the hurdles?**

Preprocessing large documents into chunks without losing coherence.

David Peno:

- **How many hours did I work since the last meeting?**

2 hours

- **What was done since the last scrum meeting?**

Start designing the final graph layout for key term relationships based on sample data.

- **What is planned to be done until the next scrum meeting?**

Optimize layout spacing and implement logic to dynamically adjust based on input size.

- **What are the hurdles?**

Label overlaps and dense clusters reduce graph readability.

Kendrick Crespo:

- **How many hours did I work since the last meeting?**

2 hours

- **What was done since the last scrum meeting?**

Select the more effective system and begin connecting it to the frontend for interactive query support.

- **What is planned to be done until the next scrum meeting?**

Develop API endpoints for frontend-backend communication and begin query flow testing.

- **What are the hurdles?**

Balancing model complexity with real-time responsiveness for the user.

Jonathan Hernandez:

- **How many hours did I work since the last meeting?**

2 hours

- **What was done since the last scrum meeting?**

Work on integrating dynamic updates from backend data and improve UI responsiveness.

- **What is planned to be done until the next scrum meeting?**

Add real-time update support and polish interactive features to enhance user experience.

- **What are the hurdles?**

Handling re-render issues and maintaining smooth performance with larger datasets.
