

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50 PM

End time: 10:00 PM

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Test the API connections and create new connections for the new model

What is planned to be done until the next scrum meeting?

Implement the new API connection for the Deep Learning model that summarizes all the text data of the document

What are the hurdles?

No hurdles at the moment

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Wrote out how the summarization and evaluation steps will fit into the overall project pipeline. Decided to use ROGUE score calculation.

What is planned to be done until the next scrum meeting?

Finish writing the basic structure of the evaluation script. Double-check that each sample document has a brief reference summary to use for scoring tests.

What are the hurdles?

Making sure the evaluation flow works for both short and long documents.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Outlined how the graph tools could be implemented to function properly with other features and began their implementation

What is planned to be done until the next scrum meeting?

Keep working on implementing the graph tools to help create graphs used for the natural language processing tasks of a note summarizer

What are the hurdles?

Figuring out the most efficient way to implement the graph tools to create concept graphs that function with other features of the project

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Found up to date beginner resources on secure sessions handling

What is planned to be done until the next scrum meeting?

Research ways to enhance security without restricting the usability and improving latency.

What are the hurdles?

Balancing strong security measures with a seamless user experience.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Made further progress on the knowledge graph component. Finalized initial rendering with sample data and started implementing custom styles for nodes and edges to improve clarity and user experience.

What is planned to be done until the next scrum meeting?

Continue adding interaction features like zoom, pan, and node expansion. Begin setting up basic error handling for graph rendering issues and explore adding tooltips with contextual info.

What are the hurdles?

Ensuring graph performance remains stable as features are layered in, and addressing occasional rendering glitches during dynamic updates.
