

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50 PM

End time: 10:00 PM

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Test the API connections and create new connections for the new model

What is planned to be done until the next scrum meeting?

Implement the new API connection for the Deep Learning model that summarizes all the text data of the document

What are the hurdles?

No hurdles at the moment

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Completed the first version of the evaluation script structure with placeholder summaries and dummy ROUGE score output.

What is planned to be done until the next scrum meeting?

Begin writing a short guide on how to use the evaluation script once actual summaries are available.

What are the hurdles?

Need to keep the script flexible enough to handle both single and multi-paragraph summaries.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Continued to work on implementing the graph tools in order to create graphs used for the purposes of the note summarizer

What is planned to be done until the next scrum meeting?

Keep working on the implementation of the graph tools while visualizing how it would function with the notes that users would want to summarize

What are the hurdles?

Envisioning how the graph tools would create the graphs from text without having the text

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Researched ways to enhance security without restricting the usability and improving latency.

What is planned to be done until the next scrum meeting?

Connect a simple frontend component (like a login form or data display table) to a backend endpoint to validate connectivity.

What are the hurdles?

The backend may send data in a structure the frontend isn't expecting

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Made continued progress on the knowledge graph component. Enhanced node and edge styling for better readability and began refining the UI layout. Also implemented basic error handling to catch rendering issues and improve stability.

What is planned to be done until the next scrum meeting?

Add interactive features like zoom, pan, and expandable nodes. Begin integrating tooltips for node details and prepare the setup to handle real data input for testing.

What are the hurdles?

Maintaining responsiveness as the graph grows in complexity and resolving occasional visual glitches when rerendering the graph.
