

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 12:10pm

End time: 12:30pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Testing the API connections and create new connections for the new model

What is planned to be done until the next scrum meeting?

Keep implementing the Deep Learning models that summarizes all the text data of the document

What are the hurdles?

Some minor bugs with the api

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Made edits to the workflow diagram for the summarization pipeline. Also began listing API endpoint ideas for sending extracted text to the summarization module and receiving back processed summaries.

What is planned to be done until the next scrum meeting?

Draft sample input and output formats for the summarization API.

What are the hurdles?

Still figuring out the best way to keep file handling efficient and secure, especially with different file sizes and formats.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on implementing the graph tools and seeing how they can be used to make concept graphs

What is planned to be done until the next scrum meeting?

Continue to work on the implementation of the graph tools and envisioning their role in summarizing notes that users want to summarize

What are the hurdles?

Figuring out how the graph tools can be used with the other features and determining how the input text from a document is used to generate the graphs

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Research ways to prevent that the backend may send data in a way that the frontend doesn't expect it.

What is planned to be done until the next scrum meeting?

Research the structure and format of the data returned by the backend matches with the frontend

What are the hurdles?

Lack of standardized documentation for API responses.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Continued making progress on the knowledge graph component. Improved node and edge styling, refined layout structure, and added basic error handling to support more stable rendering.

What is planned to be done until the next scrum meeting?

Moving forward with UI tweaks—this week's focus will be on improving visual clarity, spacing, and responsiveness across devices. Will also begin fine-tuning interactive elements like tooltips and hover effects.

What are the hurdles?

Ensuring UI adjustments don't interfere with the dynamic behavior of the graph, and managing layout consistency across various screen sizes.
