

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:40pm

End time: 10:00pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Testing the API connections and create new connections for the new model

What is planned to be done until the next scrum meeting?

Keep implementing the Deep Learning models that summarizes all the text data of the document

What are the hurdles?

Some minor bugs with the api

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Finalized the preprocessing flow for handling uploaded documents. Created a list of format-specific cleaning tasks. Also wrote down a checklist of edge cases to use during initial testing, like files with mixed formatting or embedded images.

What is planned to be done until the next scrum meeting?

Start planning how to connect the preprocessing output to the summarization input, making sure formatting and structure are maintained.

What are the hurdles?

Handling inconsistencies in document formatting when some files include tables or images.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on implementing the graph tools to be able to create concept graphs using terms from the notes that users enter

What is planned to be done until the next scrum meeting?

Keep working on implementing the graph tools to create graphs that connect key terms from documents

What are the hurdles?

Determining how the graph tools could have information on which terms and words are significant

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Researched standardized documentation for API responses.

What is planned to be done until the next scrum meeting?

Research date formatting across different endpoint environments.

What are the hurdles?

Limited access to certain environments, slowing down testing.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Moved forward with the UI improvements—finalized the updated node styling, improved layout responsiveness, and added basic animations to enhance graph interaction.

What is planned to be done until the next scrum meeting?

Begin refining tooltip behavior and structure, and start prepping integration points for real data input into the graph component.

What are the hurdles?

Maintaining smooth performance with animated elements and ensuring consistency in styling across various browsers and screen sizes.
