

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:40pm

End time: 9:50 pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Keep implementing the rest of the API calls, and test the rest of the API endpoints

What is planned to be done until the next scrum meeting?

Keep Implementing the Deep Learning models that creates the graphs based on all the text data of the document

What are the hurdles?

No hurdles

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Outlined the expected structure for how chunked and cleaned text will be passed into the summarization module. Also drafted a basic input validation function to check for empty text.

What is planned to be done until the next scrum meeting?

Work on the validation step and prepare a small batch of test documents with intended formatting issues to see if the system can catch and clean them.

What are the hurdles?

Edge cases like scanned documents with large tables still need special handling strategies.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Compared the different graph visualization tools to find which one is the best for creating concept graphs

What is planned to be done until the next scrum meeting?

Keep researching which graph tool is best for the project and work on implementing them to create graphs

What are the hurdles?

Finding the strengths of the different graph visualization tools and knowing which one is most suitable for the project

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Researched Inconsistent error messages or unexpected edge cases

What is planned to be done until the next scrum meeting?

Researched ongoing limited access to critical testing environments.

What are the hurdles?

Dependency on third-party services that are either unavailable or not returning expected results.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Refined the integration of test data into the graph—focused on improving how related concepts are visually grouped. Also made minor UI adjustments to improve label clarity and tooltip responsiveness.

What is planned to be done until the next scrum meeting?

Start optimizing the layout algorithm for better spacing and readability as graph size increases. Begin prepping the component for connection with actual summarization output.

What are the hurdles?

Avoiding visual clutter as more nodes are introduced and ensuring layout performance holds up during real-time updates.
