

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50 pm

End time: 10:00 pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Completed API integration and API testing

What is planned to be done until the next scrum meeting?

I will complete a comparison summary table and add usage recommendations tailored to our AI learning app's document needs.

What are the hurdles?

Some tools require additional setup (e.g., API keys or dependencies), and inconsistent text output from PDFs may affect quality evaluation.

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Outlined the expected structure for how chunked and cleaned text will be passed into the summarization module. Also drafted a basic input validation function to check for empty text.

What is planned to be done until the next scrum meeting?

Work on the validation step and prepare a small batch of test documents with intended formatting issues to see if the system can catch and clean them.

What are the hurdles?

Edge cases like scanned documents with large tables still need special handling strategies.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on implementing the graph tool to create graphs using the important words in a document and the relationships between them

What is planned to be done until the next scrum meeting?

Keep making progress on determining the best graph tool for creating concept graphs and implementing it for the note summarizer

What are the hurdles?

Being able to find related words in the document and their relationship

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Researched on third-party services that are either unavailable or not returning expected results

What is planned to be done until the next scrum meeting?

Researched inconsistent availability of third-party services

What are the hurdles?

Lack of direct support of slow response times from third-party vendors.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Made progress fine-tuning the way grouped concepts are displayed within the graph. Adjusted spacing logic and label placement to improve visual clarity, especially in more complex clusters.

What is planned to be done until the next scrum meeting?

Begin preparing for live data integration from the summarization output and continue improving layout responsiveness for larger graphs.

What are the hurdles?

Balancing node density with readability, and ensuring that dynamic updates don't cause layout shifts or slow performance.
