

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:40 pm

End time: 9:50pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Add detailed usage recommendations tailored to the types of documents used in our AI learning app (e.g., slides, books, research papers)

What is planned to be done until the next scrum meeting?

Run more tests with a variety of document formats to validate tool performance and generate usage insights

What are the hurdles?

No hurdles at the moment

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Outlined the expected structure for how chunked and cleaned text will be passed into the summarization module. Also drafted a basic input validation function to check for empty text.

What is planned to be done until the next scrum meeting?

Work on the validation step and prepare a small batch of test documents with intended formatting issues to see if the system can catch and clean them.

What are the hurdles?

Edge cases like scanned documents with large tables still need special handling strategies.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on improving how the graphs are created using important concepts and how the graph is displayed

What is planned to be done until the next scrum meeting?

Keep making improvements on how the graph could be better designed and how it could make use of important concepts in a document and relationships between words

What are the hurdles?

Determining how to find related words in a document and how they are connected

Kendrick Crespo:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Figure out reproducing the latency spikes in a controlled testing environment.

What is planned to be done until the next scrum meeting?

Research existing monitoring tools may not provide granular enough data to trace exact latency sources.

What are the hurdles?

Limited access to production-like environments may skew results.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

3 hours

What was done since the last scrum meeting?

Expanded the graph component's integration with summarization data—nodes now reflect actual extracted topics, and early relationship mapping between concepts is functioning.

What is planned to be done until the next scrum meeting?

Improve the logic for drawing edges between related nodes and begin testing the system's behavior with larger document sets.

What are the hurdles?

Ensuring that relationship data is interpreted correctly and avoiding clutter in the visual layout as node density increases.
