

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50pm

End time: 10:00pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Ran more tests with a variety of document formats to validate tool performance and generate usage insights

What is planned to be done until the next scrum meeting?

Start with the new sprint requirements

What are the hurdles?

No hurdles right now

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Completed the first version of the data schema for tracking user actions. Also researched lightweight logging libraries that can be integrated with our backend to store analytics data efficiently.

What is planned to be done until the next scrum meeting?

Start building a basic tracking function that logs key actions and stores them in a local JSON file or temporary database.

What are the hurdles?

Making sure the logging doesn't interfere with the app's performance and deciding which actions are most useful to log.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on implementing a prototype that uses the output obtained using natural language processing and creates a concept graph from it

What is planned to be done until the next scrum meeting?

Continue working on the prototype and finding the best ways to transform the important concepts and their connections into a graph

What are the hurdles?

Finding the most efficient way to create the graph using important terms and their relationships

Kendrick Crespo:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Collected information on time constraints impacting deep investigation into tooling alternatives and implementation

What is planned to be done until the next scrum meeting?

Research ai concepts and understand how it operates with web apps.

What are the hurdles?

Non right now

Jonathan Hernandez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Completed layout adjustments to enhance node distribution and reduce clutter. Also refined edge rendering logic for smoother visual transitions during interactions.

What is planned to be done until the next scrum meeting?

Continue improving UI elements—focus on finalizing tooltip design, adjusting node animations, and preparing the component for integration testing.

What are the hurdles?

Managing animation timing without performance drops and ensuring that interactive elements remain consistent across devices.
