

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50pm

End time: 10:00pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Ran more tests with a variety of document formats to validate tool performance and generate usage insights

What is planned to be done until the next scrum meeting?

Start with the new sprint requirements

What are the hurdles?

No hurdles right now

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Started planning a lightweight feedback system for users to rate the usefulness of generated summaries and concept graphs. Outlined a basic UI component idea and defined what feedback data we'd want to collect for future analysis.

What is planned to be done until the next scrum meeting?

Design mockups for the feedback component and consider where it should be placed in the interface for maximum visibility and ease of use.

What are the hurdles?

Figuring out how to keep the feedback system simple enough to encourage responses, while still collecting helpful data without overwhelming the user.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on creating the prototype for making concept graphs and finding the best ways to transform the important concepts and their connections into a graph

What is planned to be done until the next scrum meeting?

Keep working on implementing the prototype so that the previous output that resulted from NLP being applied to a document could be converted into a concept graph

What are the hurdles?

Determining the design of the graph and the organization of the nodes and edges

Kendrick Crespo:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Researched ai concepts and understand how it operates with web apps.

What is planned to be done until the next scrum meeting?

Continue researching ai concepts and understand how it operates with web apps.

What are the hurdles?

Non right now

Jonathan Hernandez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Made final adjustments to tooltip behavior and polished node animations for smoother transitions. Also tested responsiveness across different screen sizes to ensure consistency.

What is planned to be done until the next scrum meeting?

Begin wrapping up the graph component for integration—test with real-time data flow and finalize visual settings for presentation.

What are the hurdles?

Ensuring the component remains stable under frequent updates and handling minor inconsistencies in data formatting from upstream outputs.
