

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 9:50pm

End time: 10:00pm

Luis Gonzalez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Conducted comparative testing of `pdfplumber`, `PyMuPDF`, and `python-docx` using various document types.

What is planned to be done until the next scrum meeting?

Finalize the comparison summary table with all key evaluation metrics

Write up a short report with usage recommendations tailored to our AI learning app's needs.

Prepare a brief presentation summary for the mid-sprint sync to explain tool selection and rationale.

What are the hurdles?

Some PDFs (especially scanned or complex formatted ones) produce inconsistent text output, affecting reliable evaluation.

A few libraries require additional handling for edge cases (e.g., encoding issues, missing metadata).

Anjani Mogallur:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Created low-fidelity mockups for the summary and concept graph feedback component, including a simple thumbs-up/down version and an optional comment box.

What is planned to be done until the next scrum meeting?

Review the mockups with the team and choose which version to move forward with. Start planning how feedback data will be stored.

What are the hurdles?

Deciding how anonymous or identifiable the feedback should be to balance privacy with usefulness.

David Peno:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Worked on implementing the prototype that creates concept graphs with important concepts and made improvements on the design for the nodes and edges

What is planned to be done until the next scrum meeting?

Continue working on the design of the graphs created by the prototype and finding the most efficient way to represent the important concepts and their relationships

What are the hurdles?

Determining the relationships between the key terms in a document and translating their relationship to the generated graphs

Kendrick Crespo:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Researched ai concepts and understand how it operates with web apps.

What is planned to be done until the next scrum meeting?

To identify bugs introduced when wiring frontend components to backend data flows, especially when using frameworks like React, Angular, or Vue.

What are the hurdles?

Difficulty tracing the source of bugs due to complex component interactions and asynchronous API calls.

Jonathan Hernandez:

How many hours did I work since the last meeting?

3 hours

What was done since the last scrum meeting?

Tested the graph component with live data input—verified that nodes and edges update in real time without breaking layout or interactions. Minor UI polishing was also done to finalize colors and spacing.

What is planned to be done until the next scrum meeting?

Finalize integration testing and begin documenting the component's structure and usage for the team.

What are the hurdles?

Occasional sync delays between data updates and graph rendering; working on a fix to maintain fluid interaction.
