

Daily Scrum Meeting Minutes

Attendees: Luis Gonzalez, Jonathan Hernandez, David Peno, Kendrick Crespo, Anjani Mogallur

Start time: 4:25 PM

End time: 4:45 PM

Luis Gonzalez:

How many hours did I work since the last meeting?

2 hours

What was done since the last scrum meeting?

Research on the deep learning models we are going to use for the app

What is planned to be done until the next scrum meeting?

Do more research and implement the deep learning models.

What are the hurdles?

No hurdles at the moment

Anjani Mogallur:

How many hours did I work since the last meeting?

2 hours

What was done since the last scrum meeting?

Completed initial research on available NLP libraries for summarization. Began exploring different methods for evaluating summary quality and working on what metrics can be used to do so.

What is planned to be done until the next scrum meeting?

Look into existing methods and tools that are used to check the quality of summaries.

What are the hurdles?

Figuring out how to measure summary quality in a way that students actually read and understand notes.

David Peno:

How many hours did I work since the last meeting?

2 hours

What was done since the last scrum meeting?

Experimented with different graph visualization tools and explored how graphs can be created using them

What is planned to be done until the next scrum meeting?

Continue using the graph visualization tools and determine their differences and research how they could be used in natural language processing tasks

What are the hurdles?

Figuring out how to incorporate these tools and how to implement them in the project to generate graphs that help summarize notes

Kendrick Crespo:**How many hours did I work since the last meeting?**

2 hours

What was done since the last scrum meeting?

Researched ways to develop API endpoints for frontend-backend communication and query flow testing.

What is planned to be done until the next scrum meeting?

Research ways to balance model complexity with real-time responsiveness for the user.

What are the hurdles?

Connecting the backend API endpoints effectively with the frontend could lead to issues.

Jonathan Hernandez:**How many hours did I work since the last meeting?**

2 hours

What was done since the last scrum meeting?

Started building a small web page layout to prepare for testing the interactive knowledge graph component.

What is planned to be done until the next scrum meeting?

Finish the basic page structure and connect it to mock data for initial functionality testing.

What are the hurdles?

Making sure the layout is responsive and that graph rendering doesn't conflict with the overall page design.
