

Sprint Review Meeting Minutes:

Project: USB Drop Attack

Attendees: Roberto Martinez, Lauren De Leon, Mohammed Alabdajabbar, Nicholas Marini, Jonathan Ruiz

Start time: 3:30 PM

End time: 4:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners:

- User Story: 5 As a report writer, I want to structure the report based on our research. This is so that we begin with the important sections in the next sprints.
- User Story: 5 As a technical team member, I want to program a Digispark so that an awareness message pops up. This is so that we show what a malicious usb does.
- User Story: 5 As a user trying the simulated bait attack, I want to learn how usb attacks happens and how it affects other people by inserting a usb and seeing the message
- User Story: 5 As an audience target member, I want to check an awareness poster, so that I know and understand the risks that happen when plugging a malicious usb.
- User Story: 5 As an analyst, I want to make a couple of HTML or text formats to the team to see which format is better for educating users.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- User Story: 5 As an audience target member, I want to check an awareness poster, so that I know and understand the risks that happen when plugging a malicious usb.
 - How this should be reflected on the user task definition in Mingle:
 - This story is in progress, but will be delayed to a future sprint mostly because it relies on our progress on the report
