

Sprint Review Meeting Minutes:

Project: USB Drop Attack

Attendees: Roberto Martinez, Lauren De Leon, Mohammed Alabdajabbar, Nicholas Marini, Jonathan Ruiz

Start time: 3:30 PM

End time: 4:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners:

- User Task: 5 Research 3 real-world USB baiting incidents
- User Task: 5 Identify USB attack methods from sources
- User Task: 5 Create an outline for the final presentation
- User Task: 5 Brainstorm topics for final report
- User Task: 5 Assign individual roles for design and writing for next sprint

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- User Task: 3 Create an outline for the final presentation
 - How this should be reflected on the user task definition in Mingle:
 - It is too early to do this task because the work on the report was not started yet. We will move this to a future sprint and will actually start making the outline of the final presentation once the report is almost finished.
