Attendees

Obilio Cardozo
Andrea Matos
Michal Rodney
Katherine Barrios
Genaro Brito

Start time 6:30 PM

End time 7:30 PM

The following user stories were created/discussed/refined/prioritized.

- All user stories were completed.

The user stories below are completed.

1. As a job seeker, I want the extension to highlight suspicious job listings so that I can potentially avoid scams.
2. As a developer, I want the extension to parse job board HTML structures so that it can identify and flag anomalies.
3. As a user, I want to receive a warning when a job listing lacks essential information so that I can assess its legitimacy.
4. As a developer, I want to integrate the extension with a Python backend so that I can leverage machine learning models for scam detection
5. As a QA tester, I want to simulate various job listings so that I can verify the extension's detection accuracy.
6. As a user, I want to provide feedback on flagged listings so that the system can improve over time.
7. As a user, I want to customize the extension's sensitivity settings so that I can control the number of listings flagged.
8. As a user, I don't want to be confused and I want to know how to use the program.
