

Sprint Planning Meeting Minutes

Attendees

Obilio Cardozo
Andrea Matos
Michal Rodney
Katherine Barrios
Genaro Brito

Start time: 6:00pm

End time: 7:00pm

After discussion, the velocity of the team was estimated to be **29 story points**.

The product owner chose the following user stories to be done during the next sprint. They are ordered based on their priority.

1. **As a user, I want the tool to display a message when no suspicious content is detected so that I know the job is likely safe.**
Acceptance Criteria: If no flagged keywords are found, a message like "No suspicious content detected" is shown.
Story points: 3
2. **As a developer, I want to write unit tests for the keyword detection logic so that we can ensure it works correctly.**
Acceptance Criteria: The logic is tested with flagged inputs, safe inputs, and edge cases.
Story points: 3
3. **As a user, I want an "About" section on the site so I can understand what the tool does.**
Acceptance Criteria: The site includes a short description explaining the purpose of Job Guard.
Story points: 3
4. **As a developer, I want to apply basic CSS so the site is clean and easy to read.**
Acceptance Criteria: The layout uses readable fonts, spacing, and button styling.
Story points: 3
5. **As a user, I want to see a loading indicator while the analysis runs so I know it's working.**
Acceptance Criteria: A spinner or loading message is shown while the result is being processed.
Story points: 3

6. **As a user, I want to reset the form easily so I can clear my input and start over.**
Acceptance Criteria: A "Clear" or "Reset" button is available that clears the input box and result section.
Story points: 3
7. **As a developer, I want to begin integrating feedback messages based on flagged keyword categories.**
Acceptance Criteria: Detection results are grouped or explained by categories (e.g., salary-related, vague language, payment requests).
Story points: 3
8. **As a user, I want to download or copy the analysis report so I can keep a record of the scan.**
Acceptance Criteria: Provide a "Copy to Clipboard" or "Download as TXT/JSON" option for the analysis results.
Story points: 3
9. **As a developer, I want to log all scans (timestamp + URL/text + result) so we can track usage and improvement areas.**
Acceptance Criteria: Each scan is recorded in a simple in-memory or flat-file log with date/time, input, and outcome.
Story points: 5

The team members indicated their willingness to work on the following user stories.

Obilio Cardozo

- User Story: 1, 2
- Total number of story points: 6

Andrea Matos

- User Story: 3, 4
- Total number of story points:

Michal Rodney

- User Story: 5, 6
- Total number of story points: 6

Katherine Barrios (**Product Owner**)

- User story: 7, 8
- Total number of story point: 6

Genaro Brito

- User story: 9
- Total number of story points: 5
