What went wrong?

- We encountered some minor delays in integrating the feedback categorization logic.
- The "About" section was overlooked during early development and still needs attention.
- A few team members had trouble syncing due to overlapping responsibilities outside of class.

Did we do a good job estimating our team's velocity?

Yes, the sprint's estimated number of story points was ambitious but mostly accurate. The pace matched our current workflow well.

Did we do a good job estimating the points (time required) for each user story?

Some stories were a bit more complex than expected, but overall, accurate.

Did each team member work as scheduled?

Yes, all members contributed to their assigned stories

What went right?

- Core UI functionality was completed and is fully interactive.
- Users can now paste descriptions, analyze results, and get immediate feedback.

How to address the issues in the next sprint?

- Prioritize and break down remaining features like feedback messages into smaller tasks.

How to improve the product?

- Polish the visual design with better spacing and consistency.
- Finalize and write content for the "About" section to clearly explain the tool's purpose.
