The following user stories were completed:

- As a job seeker, I want to paste or upload a job listing (URL or text) so that the system can analyze it for fraud.
- As a user, I want a dashboard showing summary risk levels (Low / Medium / High) so that I can quickly assess listings.
- As a job seeker, I want to view detailed explanations of each fraud indicator so I understand why a listing was flagged.
- As a user, I want to submit feedback (e.g. false positive or confirming fraud) so the system improves.
- As an admin/researcher, I want to review flagged listings and feedback so I can improve detection algorithms.
- As a job seeker, I want to save analyzed listings to a personal list so I can track or revisit them later.
- As a user, I want to filter listings by risk level, date added, or source so I can prioritize follow-ups.
- As a job seeker, I want to receive optional email summaries or notification digests of new high-risk saved listings.
- As a user, I want to see anonymized examples of real fraudulent job ads so I can learn how to spot them independently.
- As a job seeker, I want to whitelist trusted company emails or domains, so legitimate listings don't trigger alerts.
