

Installation Guide

1. Setup an introduction meeting with Product Owner - Liane Sangollo contact information in spreadsheet
 - Will give you insight on what she wants done with App
2. Get in contact with Adrian - Get information from Product owner Liane Sangollo
 - Owner of that product database - Firebase)

3. talk with Jaden - Get information from Product owner Liane Sangollo
 - Owner of GitHub repository

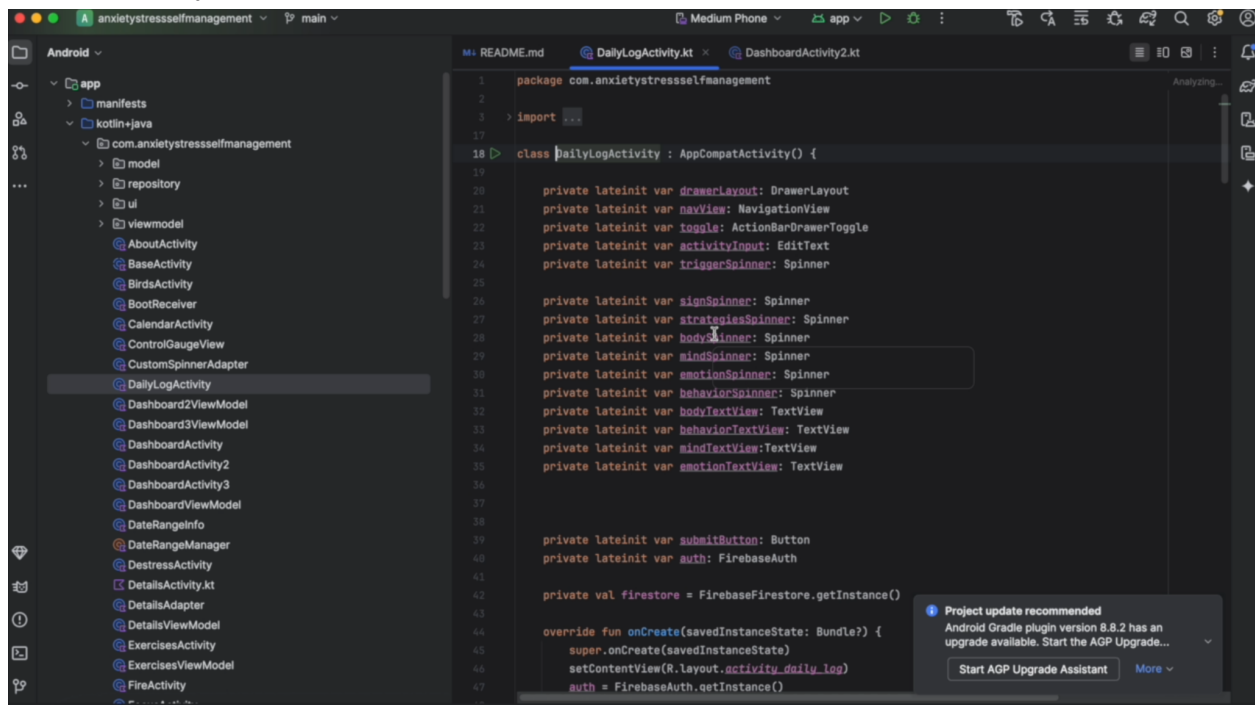

4. Install GitHub Desktop

- For better version control, and helps with team collaboration.

5. Android Studio

- Where you run an emulator for the app, as well as for development.

6. Google Console

- Where you run the repo so that it can be used with Android Studio.

The screenshot shows the Google Play Console interface for the app **HOWRU.LIFE** (com.anxietystressselfmanagement). The left sidebar contains navigation links: All apps, Dashboard, Statistics, Publishing overview, Test and release, Monitor and improve, Grow users, and Monetize with Play. The main content area includes a top bar with 'Unread notifications' and the app name. Below this is a 'Publishing overview' section indicating no unpublished changes. The 'Test and release' section shows the latest production release from 2 days ago with 100% compatibility across phones and tablets, and a table with Crash rate, Installs (1), and Install base (100%). The 'Monitor and improve' section shows metrics for the last 28 days compared to the previous 28 days, including Crash rate, ANR rate, and Average rating, all currently at 0. A notification banner indicates an action by August 31, 2025, to update the target API level. The 'Grow users' section shows metrics for the last 28 days, including Device acquisitions, MAU, and DAU, all currently at 0. The 'Monetize with Play' section prompts the user to set up a merchant account to monetize the app, with a 'Get started' button.
