Enzo Swayne, Elisha JeanBaptiste, Ernesto Rodriguez, Jeffrey Arias

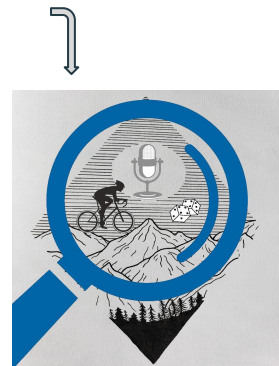

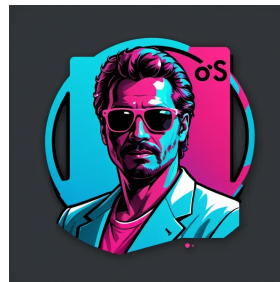

The group as a whole

Together we came up with a name for the app and ideas for the logo. We also all contributed to created the recommendation system together.

Enzo Swayne

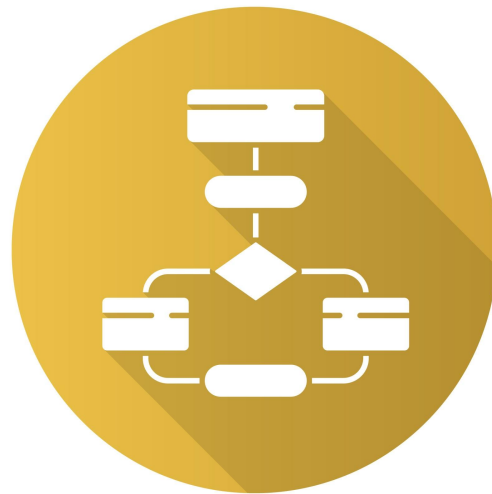

Enzo utilized photoshop and create a logo that truly captures the essence of what we are trying to create. He worked on UI elements and also assisted with the sign in page, ensuring that the authentication was properly set up.

Elisha JeanBaptiste

Elisha was responsible for the recommendation feature, ensuring that whatever the category that the user chose, there were a list of places given to the content feature so users can view.

Ernesto Rodriguez

Ernesto was responsible for adding the location services to the app, ensuring the user sees accurate places near them. He also assisted in the preference feature, ensuring users can get recommendations based on their preferences.

Jeffrey Arias

Jeffrey was responsible for the login and authentication of the app, this was necessary so that each user get a different experience on the app and so that their recommendations are properly saved for future use.
