 - Yes
- Did we do a good job estimating the points (time required) for each user story?
 - Yes
- Did each team member work as scheduled?
 - Yes

What went right?

- Design Completion: We successfully created the designs for the frontend screens, providing a solid visual and functional direction for the app.
- Repository Setup: The repository was created, ensuring all team members have a centralized and organized location to work from, track changes, and collaborate seamlessly.
- Login Page Implementation: We integrated the login page with the backend, marking an important step in connecting frontend and backend components and ensuring users can access the application securely

How to address the issues in the next sprint?

- How to improve the process?
 - Have a short retrospective with the team to identify any specific blockers from this sprint
- How to improve the product?
 - Review the frontend screens and flows from the user's perspective to identify areas where the UI or functionality could be more intuitive or visually appealing.
