

Sprint Review Meeting Minutes

Attendees: Jose Manuel Hermida-Larios, Valerie Hernandez, Diego Jones, Matthew Larrosa, Alex Narvaez-Echeverria

Start time: 10:30 PM

End time: 11:00 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners:

- Bloodwork API: As a healthcare provider, I want an API to securely store and retrieve bloodwork data, so that I can easily access patient results.
- Medication Routine API: As a patient, I want an API to track my medication routine, so I can get reminders and monitor my adherence.
- Vaccines API: As a doctor, I want an API to track patient vaccinations, so I can ensure they are up-to-date on required immunizations.
- Presentation Board: As a presenter, I want a digital board to create and organize my presentation slides, so that I can easily share my content during meetings.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- None
