

Date: 9/4/2024

Attendees: Erick Pelaez Puig, Elnaz Toreihi, Valeria Giraldo, Jeslyn Chacko

Start time: 8:30 PM

End time: 8:50 PM

Erick Pelaez Puig:

- What have you done since the last scrum meeting?
 1. Continued researching Large Language Model basics.
 2. Started researching the ethics of Large Language Models.
 3. Started researching the most popular LLMs and how they compare.
- What is planned to be done until the next scrum meeting?
 1. Continue my current research.
 2. Begin researching other aspects of LLMs such as how to train them.
- What are the hurdles?
 1. Time management.

Elnaz Toreihi:

- What have you done since the last scrum meeting?
 1. I continued my research and review of LLM concepts and explored platforms, such as Hugging Face, to train and deploy models.
- What is planned to be done until the next scrum meeting?
 1. I hope to further this research and understand how to successfully deploy an LLM model.
- What are the hurdles?
 1. Ensuring the success in deploying an LLM model.
 2. Meeting the necessary goals for the project.

Valeria Giraldo :

- What have you done since the last scrum meeting?
 1. I've started investigating the data we'll be using, focusing on understanding its structure and identifying any initial challenges. I've also begun studying the basics of how Large Language Models (LLMs) might be applied to our data.
- What is planned to be done until the next scrum meeting?
 1. I plan to continue studying the data in more detail, start some preliminary preprocessing, and explore foundational concepts related to LLMs to see how they align with our project goals.
- What are the hurdles?
 1. The main challenges are thoroughly understanding the data while also managing time effectively as we get deeper into studying and applying LLMs.

Jeslyn Chacko:

- What have you done since the last scrum meeting?
 1. I continued my research on LLM's and its connection to deep learning.
- What is planned to be done until the next scrum meeting?
 1. During the next meeting we hope to get more information on our roles for the project
- What are the hurdles?
 1. One of the hurdles for the project is managing time effectively.
