Absent Members: None

A Software Application for Generating Geospatial Format Files from Geotagged Digital Media

After a show-and-tell presentation, we consolidated our findings as follows.

- Features/functions that were tested thoroughly and worked as expected without any errors/issues.
 - Figma front end mockup was tested and worked as expected.
 - The purpose was to have an idea of what the product could look like using modern tools.
- Features/functions that were tested thoroughly and did NOT work as expected. Here is the list of issues/errors observed.
 - NetBeans GUI initially did not work as expected as there was a learning curve.
- Features/functions that were tested thoroughly and would benefit from some improvement/enhancements. Here is the list of suggested enhancements/improvements.
 - Figuring out how to connect Figma to the back end will improve the project.
