

Security Awareness training platform

Sprint Review Meeting Minutes:

Attendees: Ryan Blanco, Christopher Dorta, Gabriel Frisancho, Julian Sandoval, Patrick Charles

Start time: 4:45 PM

End time: 5:45 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

The team members indicated their willingness to work on the following user stories.

- Gabriel Frisancho
- User Story: Sprint 1 - 25
- As a Member lead, I have been researching more about the nist framework and finishing up the final touches and topics for our cybersecurity training course. Also researching more topics that would effectively help our training course to teach people about cybersecurity

- Ryan Blanco
- User Story: Sprint 6 - 26
- As a member of this group, I have gained knowledge and analyzed various social engineering tactics to better understand their impact on security protocols and improve our defense strategies.

- Patrick Charles
- User Story: Sprint 2 - 27
- As a member of this group, I am incorporating real-world scenarios and interactive modules. I aim to bridge the gap between theoretical knowledge and practical application. Additionally, I am assessing feedback mechanisms to continuously refine the training content, ensuring it remains up-to-date with evolving security threats and industry best practices. My goal is to foster a culture of proactive security awareness, empowering all employees to take an active role in safeguarding organizational assets.

- Christopher Dorta
- User Story: Sprint 6 - 28
- As a member of this group, I have been reviewing newly shared documents that will help bring our project to life. I have also researched more into cybersecurity details that could be used in the training platform to help our group's goal. Researched useful training methods and graphics that will help the group progress with our training platform.

- Julian Sandoval

- User Story: Sprint 1 - 29
- As a member of this group, I have slowly been putting together different aspects of Cybersecurity to cover not only all but technical individuals as well to build our training. NIST looks like the framework we will be following as it is very well governed and has great information.
