

Daily Scrum Meetings

Date: 09/04/2024

Attendees: Richard Chong, Andres Lopez, Michael Camelio, Carlos Ramirez, Jason Martinez

Start time: 10pm

End time: 10:15pm

- Student1: Richard Chong
 - What have you done since the last scrum meeting?

I have watched part of a video on react js and the basics behind it.
 - What is planned to be done until the next scrum meeting?

I plan on continuing to do some research on react js and how it works and how it functions. I will also continue looking back at the code from the previous people that were working on the project.
 - What are the hurdles?

Some of the hurdles are going to be learning react js and understanding the code of the previous people.
- Student 2: Andres Lopez
 - What have you done since the last scrum meeting?

This is our first daily scrum meeting
 - What is planned to be done until the next scrum meeting?

I will help the team mates coordinate with one another and hand over control of the existing code base to allow them to begin working independently and form groups to complete tasks. I will also facilitate communication with out project owner so that the new team leader may interact with them directly.
 - What are the hurdles?

This is a new team and we are still getting accustomed to interacting and working with one another. We are still becoming familiar with each other's skill levels and knowledge base.

- Student 3: Michael Camelio
 - What have you done since the last scrum meeting?

Today, I've check the outline for the back-end of the project, in the look for key parts of the code to be modified to support AWS.

- What is planned to be done until the next scrum meeting?

Continue checking, understanding and improving the code to be compatible with AWS.

- What are the hurdles?

Extensive review of documentation.

- Student 4: Carlos Ramirez
 - What have you done since the last scrum meeting?

Go over current code and begin to build an understanding of what currently exists.

- What is planned to be done until the next scrum meeting?

Going over the current database setup in order to fully understand the existing code and data available in order to be able to revise it and expand upon it to meet our needs.

- What are the hurdles?

Going through the existing database files and breaking it into parts in order to easier understand what the current system uses/can achieve in its current state and finding any already existing issues.

- Student 5: Jason Martinez
 - What have you done since the last scrum meeting?

Look for ways on how to learn React and more of Github to better prepare myself for the tasks in the project.

- What is planned to be done until the next scrum meeting?

Look towards resources to learn React to help towards the project.

- What are the hurdles?

Learning a new programming language and figuring out how to learn it effectively.
